

FOR IMMEDIATE RELEASE

STANFORD, CA – February 28, 2009 – Inedible Software, LLC announced today the launch of their newest iPhone application, Shotgun Free. Shotgun Free uses the iPhone’s built-in accelerometer to replicate the cocking and firing of a shotgun. It is currently the only shotgun application sophisticated enough to recognize each of the distinct motions required to load a pump-action shotgun. Shotgun Free is available at no cost on the iTunes App Store and is compatible with all iPhone and iPod touch models. A companion app, Shotgun Pro, is awaiting approval and will provide additional shotgun models for just \$0.99.

ABOUT INEDIBLE SOFTWARE, LLC – Inedible Software was founded by Stanford University seniors James Anthony and Edward Marks. James is a Physics major from New York, NY, and Eddie is an Economics and Mathematics double major from St. Louis, MO. They began developing iPhone applications after taking Stanford CS193P: iPhone Development, the first ever university iPhone class, offered last fall and taught by two Apple employees. Their flagship application, Air Guitar, has received critical acclaim and is available on the iTunes App Store for \$1.99.
